WELCOME

Following the traditions of the Advanced European Course on Hand Surgery organized by Professor Antal Renner in Budapest in 1995 and by Zsolt Szabó in the town of Lillafüred in 2001, with another 5 years having passed by, this time we would like to invite our friends and colleagues to another Advanced European Course on Hand Surgery.

The focus of the present Course will be on the wrist, but unconventionally, we shall discuss not only the anatomy, physiology, pathology and surgical treatment of its skeleton, but shall also cover all the anatomical structures of the wrist. We have been able to win over such world famous hand surgeons also for this particular event, who are the most well-known and most sought for speakers and clinicians in their particular areas of expertise. The unbelievable development of the appreciation, international evaluation and relations of the Hungarian Hand Surgery is confirmed by the fact that the most important past, present and future experts of IFSSH and FESSH will also visit us, thus contributing to our professional development, to the dynamic further development of our relations.

We do hope that hand surgeons of Hungary and of the neighbouring countries will take the opportunity to obtain the latest, most interesting information on this subject from the most knowledgeable experts in this field. During the programme, in addition to learning, the participants will have an opportunity to check the level of their knowledge, as the Course will be completed with a test examination, which, if passed successfully, will double the number of credit points necessary for our continuing professional training and development.

By running the social programmes in an unusual way, we also wish to leave the participants with unforgettable memories. These programmes will include an Opening Reception with serious money prizes and arts performances, as well as a Banquet Dinner organized as a training course in gastrology and wine tasting.

Hoping for a successful programme, we would like to invite all our kind colleagues to a little bit of science, a little bit of entertainment, a glass of great wine and a genuinely friendly meeting.

On behalf of the Hungarian Society for Surgery of the Hand:

*Zsolt Szabó MD PhD
Scientific Organizer*

Millennium**

26 – 28 October, 2006

LECTURES

Amadio, Peter (*Rochester, MN, USA*)

- Clinical and radiographic examination of the wrist
- Scaphoid fractures and nonunions
- Kienböck's disease
- Distal radius fractures and malunions
- Flexor tendon repair at the wrist

Baek, Goo Hyun (*Seoul, Korea*)

- Recent advances in idiopathic ulnar impaction syndrome
- Nerves (compression neuropathies) at the level of wrist
- Extensor tendon repair at the wrist

Ceruso, Massimo (*Firenze, Italy*)

- The rheumatoid wrist
- Degenerative changes at the level of wrist

Garcia-Elias, Marc (*Barcelona, Spain*)

- Wrist anatomy and biomechanics
- Scapholunate dissociation
- Lunotriquetral dissociation
- DRUJ Instability

Foucher, Guy (*Strasbourg, France*)

- Congenital malformations involving the wrist
- Proximal row carpectomy and wrist denervation
- Algodystrophy

Tonkin, Michael (*Sydney, Australia*)

- Interaction between wrist and finger deformity in rheumatoid arthritis - pathomechanisms of deformity and management options
- Wrist deformity in cerebral palsy
- Reconstruction of wrist motion following peripheral nerve injury

26 – 28 October, 2006

Dohmeier, Joachim (*Budapest, Hungary*)

- Silicon prostheses, prospects in prosthetics

Furka, Tibor (*Debrecen, Hungary*)

- The role of hand surgeons in upper limb's secondary osteoporotic fracture prevention. ECHO2006 International Osteoporosis Research Program

Magyar, Tamás (*Budapest, Hungary*)

- The role of levofloxacin in soft-tissue infection

Nyárády, József (*Pécs, Hungary*)

- Arteries and veins at the wrist

Renner, Antal (*Budapest, Hungary*)

- Wrist arthrodesis versus wrist prosthesis after trauma
- The septic wrist

Róth, Erzsébet (*Pécs, Hungary*)

- Developing skill and science – the role of experimental surgery

Simonka, János Aurél (*Szeged, Hungary*)

- Nerves (trauma and repair) at the wrist

Szabó, Zsolt (*Miskolc, Hungary*)

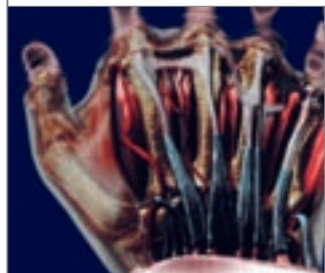

- Soft tissue substitution (flaps) at the wrist
- Tenosynovitis at the wrist level

WORKSHOPS

Welcome Reception & Workshop / *B. Braun*
“How to win 700 Euros?”

Lunch & Workshop / *Johnson & Johnson ETHICON*
“What's new in suturing wounds?”

Lunch & Workshop / *Sanofi Aventis*
“Thromboprophylaxis in the upper limb”

PRELIMINARY PROGRAM

	Thursday 26 October	Friday 27 October	Saturday 28 October
8.00		5. Lunotriquetr Diss / GME	20. Arteries & Veins /NyJ
30		6. Kienboeck / PA	21. Nerves Trauma / SJA
9.00		7. DRUJ inst / GME	22. Reconstruction / MT
30		8. Dist. Rad. Fract / PA	23. Nerves Compression / GHB
10.00		COFFEE BREAK	COFFEE BREAK
30		9. Idiopath. Ulnar Imp / GHB	24. Degenerative /MC
11.00		10. Denerv. Carpect. / GF	25. Rheumatoid Wrist / MC
30		11. Desis vs. Prosthesis / RA	26. Soft Tissue Flaps / SzZs
12.00		12. Osteoporosis / FT	27. Experimental Surgery / RE
30			
13.00		J & J ETHICON Workshop	Thromboprofilaxis / Sanofi-Aventis
30		LUNCH	LUNCH
14.00			
30		13. Flexor / PA	28. Cerebral Palsy / MT
15.00	OPENING CEREMONY	14. Extensor / GHB	29. Interaction Deformities / MT
30	Opening Lecture / MT	15. Tenosynov / SzZs	30. Algodystrophy / GF
16.00	1. Wrist Anatomy / GME	16. Silicon Prosthesis / JD	TEST EXAMINATION
30	2. Clin.Radiogr Ex. / PA	COFFEE BREAK	CLOSING CEREMONY
17.00	3. Scapholun Diss / GME	17. Congenital / GF	
30	4. Scaph Fr, Nonun / PA	18. Septic Hand / RA	
18.00		19. Antibiotic / MT	
30			
19.00	WELCOME RECEPTION		
30	B.Braun Workshop	BANQUET DINNER	

REGISTRATION

Registration fee

€ 200

Registration fee includes

Attending the lectures	*
Course Book	*
Coffee and Lunch	*
Welcome Reception	*
Certificate of Attendance	*
CME points	*

Please send your registration on-line directly to Asszisztencia Congress Bureau through our website:

Creating Innovations.

What does innovation mean to a modern day health care system? For B. Braun it means: to develop products, services, and strategies. These enhance and procure the safety of the users and improve the patients' perspective for the future.

B. Braun has a long tradition in pioneering the development of medical products. We will even continue to create more innovative products. Innovations for safety, innovations for the future, innovations of B. Braun.
